WATCHGUARD V300 CONTINUOUS-OPERATION BODY CAMERA

The WatchGuard V300 continuous-operation body camera with detachable battery, wireless uploading and expansive storage addresses law enforcement's need for cameras to operate beyond a 12-hour shift.

KEY FEATURES

DETACHABLE BATTERY – Easily change the WatchGuard V300's rechargeable battery while on the go. Keep an extra battery at the ready for unexpectedly long shifts, extra shifts or part-time jobs where a body camera is required.

AUTOMATIC WIRELESS UPLOADING – Send critical video back to headquarters while still in the field. When docked in the vehicle, the V300 uploads to evidence management systems via wireless networks like LTE and FirstNet, anytime, anywhere.

INTEGRATED WITH IN-CAR SYSTEM – One or more V300 cameras and a WatchGuard 4RE[®] in-car system can work seamlessly as a single system, capturing synchronized video of an incident from multiple vantage points.

NATURAL FIELD OF VIEW – Eliminate the fisheye effect from wide-angle lenses that warps video footage. Our distortion correction technology provides a clear and complete evidence review process.

ABSOLUTE ENCRYPTION – Elevate your data security with encryption at rest and in transit technology. V300 guards your data and your reputation.

RECORD-AFTER-THE-FACT – Go back in time and capture video from events days after they happened, even when a recording wasn't automatically triggered or initiated by the officer. Don't rely on mere seconds of pre-event buffering to prove your case.

WATCHGUARD 4RE[®]

HD PANORAMIC IN-CAR VIDEO SYSTEM

Simple controls, HD cameras, wireless uploads and full integration with body-worn cameras have made the WatchGuard 4RE the world leader for in-car video policing.

KEY FEATURES

INTUITIVE CONTROL – Icon-driven user interface and direct access keys make operation quick and simple.

FULLY INTEGRATED WITH BODY CAMERA – The WatchGuard 4RE In-Car system and one or more body-worn cameras can work seamlessly, capturing synchronized video of an event from multiple vantage points.

UPLOAD ANYWHERE, ANYTIME – Recorded events are uploaded wirelessly via cellular network from vehicle to evidence storage with no officer involvement.

SMART, EVENT-BASED RESOLUTION RECORDING – Record simultaneously in HD and SD and automatically save using a resolution configured to the event category.

FULL PANORAMIC HD COVERAGE – See everything in front of the patrol car with the stunning video quality of a rotatable HD camera and an HD panoramic camera, all in one compact, rugged housing.

NEVER MISS AN INCIDENT – **RECORD AFTER THE FACT** provides the power to go back in time and capture important evidence days after it happened, even when record wasn't pressed.

DUAL DRIVE ARCHITECTURE – Video is continuously recorded to the internal Solid State Hard Drive (SSHD) and all active recordings are written to both the internal hard drive and the removable USB Flash Drive, providing event transfer options and backup.

Full Coverage, Full Detail Front and Rear Views

Zero Impact On-Line Of Sight For Officer's Body Camera

12X Optical Zoom HD 1080p Resolution

Infrared Illumination for Low Light Camera

Added Viewing Sub-Worn Front-Facing Camera

SPECIFICATIONS

Hard Drive Storage Capacity
256GB

Certified to Military Specification
MIL STD 810-G

Operation Conditions
-40 °F to 185 °F

Integrated and GPS for Speed and Location
YES

Integrated Crash Detection
YES

Hours of Recording
Up to 80 hours

VIDEO-AS-A-SERVICE

TRANSPARENCY SHOULDN'T COME AT A HIGH PRICE

Get your cameras and get going. Our simple pay-as-you-go program helps you get everything you need for your body-worn and in-car camera video policing program with no upfront capital investment — from a robust camera system to advanced digital evidence management tools.

As the requirement for law enforcement video systems continues to grow, the obstacles to acquisition remain the same.

Raising funding and securing grants is difficult and time-consuming. Data storage and system maintenance costs are hard to predict. And video technology continues to mature, making a big investment potentially risky.

Motorola Solutions is overcoming these obstacles by delivering body-worn cameras, in-car video systems, digital evidence solutions and support services through Video-as-a-Service.

With no up-front capital investment required, you can deploy a new camera system and start using it immediately under a simple 5-year pay-as-you-go program. Everything you need is provided, including solutions to securely capture, collect, manage and share your evidence, as well as 24/7 support and no-fault warranty coverage.

And if you already have content on a digital evidence management system, we can work with you to migrate your video material to the new platform.

NO NEED TO RAISE FUNDS

Get what you need with no upfront investment and pay-as-you-go. Turn a capital investment into a manageable operational expense.

BUDGET PREDICTABILITY

Stay on budget with a low payment, fixed for 5 years, that includes your camera system, software, support, and video storage.

ASSURED PERFORMANCE

Maintain efficiency and reliability, with a no-fault warranty, advance hardware replacement and 24/7 phone support.

TECHNOLOGY REFRESH

Stay current with the latest technology, with a free refresh of your body-worn cameras and batteries during the program.

CLOUD HOSTED

Manage, store and share video evidence securely from your cloud account. We can even help you migrate your existing platform.

KNOCK DOWN DIGITAL EVIDENCE DATA SILOS

As important as it is to have the right mobile video cameras in place, it's just as critical to have the right digital evidence management tools to streamline the capture, collection, management and sharing of your data.

Capture Evidence with your Smartphone

Securely capture video, images and audio on-scene using an Android or iOS device with CommandCentral Capture.

Collect Evidence from your Citizens

Quickly gather evidence using case-specific, agency-generated links with CommandCentral Community.

Control your Entire Video System

Easily configure cameras, provision users, define permissions and maintain audit logs with CommandCentral Evidence.

Unify your Evidence Management

Intelligently organize, redact and audit all of your agency's digital evidence from one place with CommandCentral Evidence.

Simplify your Evidence Sharing

Seamlessly view and share all case-related information from one, streamlined interface with CommandCentral Records.

PACKAGE SUMMARY

	BODY-WORN CAMERAS	IN-CAR CAMERAS	INTEGRATED SYSTEM
	\$49/month	\$149/month	\$189/month
Systems	V300 continuous-operation body-worn camera, detachable battery and camera mount.	WatchGuard 4RE® in-car video system, CarDetector Mobile LPR and Vigilant PlateSearch software, infrared cabin camera, choice of forward-facing HD camera, HiFi microphone, WiFi upload kit and smart power switch.	Body-Worn Camera System + In-Car Camera System + WiFi access point/body-worn camera dock for a seamless, integrated camera system.
Software	CommandCentral Capture, CommandCentral Community, CommandCentral Evidence, and CommandCentral Records for cloud-based digital evidence collection, management and sharing. Includes free digital evidence migration to the new platform.		
Support	Five years of no-fault hardware warranty, advance hardware replacement and 24/7 phone support.		
Refresh	New body-worn camera with battery in third year.		New body-worn camera with battery in third year.

SECTION 1

COMMANDCENTRAL EVIDENCE SOLUTION DESCRIPTION

1.1 OVERVIEW

CommandCentral Evidence provides a suite of digital evidence management tools that help users contain, organize, and act on large amounts of incoming multimedia. These tools streamline the collection, capture, storage, and sharing of data from a single location. By centralizing digital evidence storage and management,

CommandCentral Evidence removes data silos and helps users get the most out of their critical information.

Users access all case content from a single, cloud-based location. Cases integrate records and evidence content, allowing users to view all media associated with a case. These cloud-based tools help users account for all evidence regardless of source. CommandCentral Evidence makes it easy to secure and share content with chain of custody intact to improve collaboration.

CommandCentral Evidence is available without any upfront investment. Monthly subscription service costs include the software and video storage. And CommandCentral Evidence uses the Azure GovCloud, securing data at rest and in transit to protect communications. This complies with CJIS guidelines and the NIST framework, audited annually against the Service Organization Control 1 and 2 reporting framework.

1.2 DEVICES

CommandCentral Evidence integrates with WatchGuard video devices to help field personnel capture and upload digital evidence from the field. The included digital evidence management tools will help your agency deploy and manage these devices and manage to keep users focused on critical tasks.

1.2.1 WatchGuard V300 Body-Worn Camera

The WatchGuard V300 HD body-worn camera provides extended operation during long shifts. To support this continuous operation, officers can easily detach and swap the battery. Charged spares can remain in a docking station for a quick shift change. This enables agencies to pool camera usage by reassigning inbound cameras to outbound officers. This keeps cameras in the field, where they are most needed.

The V300 camera is easy to activate, with four control buttons and single-press recording. If an officer does not trigger a recording, the device still captures important video evidence with the Record-After-the-Fact® technology. This feature ensures important details are captured for post-incident review.

The V300 supports automatic wireless upload of video evidence, allowing officers to stay in contact from the field without distraction. The WatchGuard V300 uploads to CommandCentral Vault via a WiFi or broadband network, such as LTE or FirstNet.

WatchGuard V300 specifications include the following:

- 4k sensor, 1080p max resolution capture, and high dynamic range.
- 128GB of memory ensures space for a full day of recorded events.
- IP67 rating for all-weather operation.
- Top backlit LCD display to view status updates on the go.
- Dual-microphone noise reduction.
- Lens distortion correction for clear video footage.
- Built-in GPS, Wi-Fi, and Bluetooth.

1.2.2 WatchGuard 4RE In-Car Video System

The WatchGuard 4RE In-Car Video System is a robust system that provides panoramic HD video coverage from a vehicle. This system integrates two cameras in a ruggedized housing. A primary camera provides normal coverage area that can be aimed as needed via a turret-mounted lens. A panoramic camera captures a wider single-camera view that is fixed in place. Together, these cameras use multi-resolution recording to capture critical event detail while on patrol.

The 4RE system features an icon-driven interface and intuitive controls to streamline field operations. Users can program various sensors to activate a new record event. These sensors include emergency lights, siren, auxiliary input, wireless microphone, vehicle speed, and crash detection. If a recording was not triggered by the user or one of these sensors, the device still captures important video evidence with the Record-After-the-Fact® technology. The system supports wireless video footage upload to CommandCentral Vault via a WiFi or broadband network, such as LTE or FirstNet.

WatchGuard 4RE specifications include the following:

- Up to 80 hours of HD video recording.
- 256 GB storage capacity.
- Certified to MIL STD 810-G standard.
- Integrated GPS and crash detection.
- Automatic Camera triggers from vehicle equipment.

1.2.3 Fully Integrated Solution

The 4RE In-Car System links with V300 body-worn cameras to create a unified video-policing system. Any camera (in-car or body-worn) can initiate a recording. Upon initiation, the other cameras will also begin recording. This feature captures an incident from multiple vantage points and synchronizes footage for playback and sharing. No one camera acts as a central controller, removing a single point of failure from the system.

The integrated system includes the body camera system, in-car system, and V300 WiFi dock. When a body-worn camera is docked in a vehicle, the device can upload data to CommandCentral Vault via broadband networks such as LTE or FirstNet. This ensures command center staff receive up-to-date information to inform better decisions.

1.2.4 Hybrid On-Premise Solution

This solution includes a hybrid on-premise and cloud configuration. With this setup, your agency's on-premise Evidence Library solution will integrate with the CommandCentral cloud. This allows users to manage and share digital evidence within CommandCentral.

1.3 THE COMMANDCENTRAL PLATFORM

CommandCentral is an end-to-end platform of interconnected solutions that unify data and streamline public safety workflows from a tip or call to case closure. Through single sign-on capabilities, your personnel can access all CommandCentral software applications with one agency username and password for a more streamlined workflow. The CommandCentral platform puts your agency's data to better use, improves safety for critical personnel, and helps keep your focus on the communities you serve.

CommandCentral evolves over time, maximizing the value of existing investments while adopting new capabilities that better meet your personnel's growing needs. With cloud-based services and an agile development methodology through constant user feedback, Motorola Solutions can deliver new features and functionality in a more manageable, non-intrusive way.

1.4 COMMUNITY INTERACTION TOOLS

CommandCentral Evidence provides a set of Community Interaction tools to enhance the partnership between your agency and the public. This solution is the foundation for transparent community engagement by streamlining the flow of data between your agency and the people you serve. The toolkit helps build public trust and increases the value of community intelligence. As a result, your agency gains new ways to connect with the public, building collaboration and transparency.

Community interaction centers around CityProtect.com. This mobile-friendly webpage offers citizens a centralized set of tools to contribute to public safety. The tools and forms within CityProtect enable you to create a dialogue with your community and promote the value of citizen intelligence. Sharing and receiving important data is streamlined to make engagement easier.

Agency Page

CommandCentral Evidence provides a dedicated, public-facing webpage for your agency. This customizable page offers a unique URL to serve as the hub for community interaction with access to the tools for the public to connect with your agency.

The agency page shows quick, rotating messages—bulletins (up to five 244-character messages)—to keep the public informed. Your agency will control the order, schedule, and expiration date of these bulletins. The page also integrates an agency's social media feeds to further unify communications.

Public Submissions

With CommandCentral Evidence, the public can submit information online with an easy-to-use interface. There are multiple self-service form options for online submissions, such as anonymous tips, public information requests, and non-emergency submissions. Your agency will decide which of these forms to deploy and how to personalize these forms with built-in form management tools. The public can submit tips using these forms on CityProtect, or via anonymous SMS communication. Together, these submissions help agencies build a more accurate operating picture. TipManager manages these submissions in a central location and saves digital content in CommandCentral Evidence. This streamlines public-provided content with officer-captured evidence in a single repository.

Digital Evidence Collection

CommandCentral Evidence's digital evidence collection features allows your agency to collect case-specific digital media from any source without needing a personal device or physical storage, such as

CDs, USBs, or other devices checked into physical evidence stores. Digital files are automatically added and tagged within the application, making access to specific information easy and efficient.

Crime Map

Crime Map is built into the CityProtect home page. Crime Map automatically publishes crime data and incident information from your CAD or RMS or CAD system to an interactive, online map. This map keeps the public informed of local crime activity and offers visibility into your operations. Crime Map also provides the following:

- Incident data display with up to hourly updates.
- Primary Agency shapefile.
- Sex offender listing options.
- Crime data download option and action link.

1.4.1 Camera Registration

Camera Registration allows citizens to register their residential or commercial security cameras in CityProtect. Each community member can create a free CityProtect user account to manage their camera information. Your agency can then access the location of these cameras and contact the owner for potential video evidence. The data from these accounts is visualized in a variety of CommandCentral applications.

1.5 FIELD RESPONSE APPLICATION

CommandCentral Evidence features a mobile application that allows users to capture video, images, and audio from the field. The application provides advanced camera controls to help users control what is captured. Integrated metadata population and tagging provides immediate access of content in the Digital Evidence Management application. This isolation ensures evidence is not accessible by other apps and ensures an uncompromised chain of custody from the moment of capture.

This application is a capture source for officers, detectives, command staff, supervisors and other law enforcement personnel. The application's user interface exists in the same ecosystem as the Digital Evidence Management tool. The field response application is available on iOS and Android.

1.6 RECORDS MANAGEMENT

CommandCentral Evidence's record management capabilities allow users to quickly and easily search video, audio, images, and other digital content. It then stores that data in a central cloud-based location, streamlining access and management across your organization to reduce the complexities of record management. As a result, this solution helps save your personnel valuable time and allows them to focus on critical tasks.

Records Management offers users the following features to benefit management workflows:

- Consolidated Record View – Enter and view incident data, officer narrative, and digital evidence with one user interface, allowing officers to spend more time in the field.

- Task Creation and Assignment – View, create, and assign tasks or projects for the day as part of the Insights Dashboard. This helps build and close cases faster by tracking progress and assigning ownership to activities.
- Unified Search – Find specific information faster by searching across all agency data.
- Master Indexes – Validate data on persons, vehicles, and organizations against the master indexes. For example, agencies can verify that an arrested person, person of interest, or suspect's information is accurate.
- Compliance Verification – Prompt officers for the information they need so you can check reports before submission and save response time.
- Record Quality Control – Keep data clean by identifying, merging, and de-duplicating records automatically.
- Trusted Agency Sharing – Remain in control of your data when you share case information with other agencies.
- Judicial Case Sharing – Share validated evidence items with trusted judicial partners for use in court, with a verifiable chain of custody.
- Crime Predictions in Dashboard – Monitor activity and set threshold alerts to identify and address crime trends.
- Data Insights Reporting – Access critical insight with pre-built reports and dashboards to make data-driven decisions.

1.7 DIGITAL EVIDENCE MANAGEMENT

CommandCentral Evidence's digital evidence management tools streamline collecting, securing, and managing multimedia evidence. These tools simplify how a secure digital evidence library is built by incorporating data from multiple sources into a unified evidence storage framework. Users can upload digital evidence from a variety of sources to quickly build cases. Evidence stored within the tool is easy to search, correlate, and review alongside other case-related information from your CAD or RMS database. Relevant content can be marked and intelligently sorted to quickly locate critical information from a central touchpoint. This unified storage framework allows personnel to make informed decisions from an organized and complete case evidence view, while offering an access control system to allow only authorized personnel to view sensitive information.

1.7.1 Store and Manage

CommandCentral Evidence simplifies building a secure digital evidence library by incorporating data from multiple sources into a unified evidence storage framework. Users can upload digital evidence files from a variety of sources to build cases. Products from Motorola Solutions, such as body-worn cameras, in-car cameras, the mobile field response application, and other CommandCentral software, automatically transmit data to Digital Evidence Management. This saves the time and effort needed to manually upload files. Once the content is securely stored, content management is more efficient.

Digital Evidence Management streamlines content management workflows, with tags and metadata that make it easier to correlate, search, and manage evidence. The application automatically links evidence based on the tags and metadata attached to those files, helping users find additional contextual information on an incident and build cases quickly. Users can search and filter content to locate additional relevant data to link to a case or incident. To quickly access evidence items that they frequently need to reference, users can group or bookmark files within the interface.

CommandCentral Evidence provides unlimited storage for events captured by the WatchGuard V300 where the applied data retention period does not exceed one year for non-evidentiary recordings or 10 years for evidentiary recordings (recordings associated with a case). Additionally, the video recording

policy must be event-based (policies that require officers to record their entire shift will not qualify for this plan). For non-camera data storage (data not captured by the body camera and/or in-car system), agencies receive 50GB of storage per device, per month, pooled across all devices in the program.

CommandCentral Evidence provides unlimited storage for events captured by the WatchGuard 4RE system where the applied data retention period does not exceed one year for non-evidentiary recordings or 10 years for evidentiary recordings (recordings associated with a case). Additionally, the video recording policy must be event-based (policies that require officers to record their entire shift will not qualify for this plan). For non-camera data storage (data not captured by the body camera and/or in-car system), agencies receive 50GB of storage per device, per month, pooled across all devices in the program.

1.8 OPTIONAL INTERFACE

CommandCentral Evidence includes an optional interface that uses different mechanisms (DB polling, REST, file polling) to extract required data fields. The interface maps data fields to a corresponding format accepted by CommandCentral Evidence, and sends them to the respective applications service.

Please see the pricing section for the specific interfaces included in this proposal.

1.8.1 Interface Server Requirements

A customer-provided virtual machine is required to support the interface. The virtual machine must meet the following minimum specifications:

- 2 vCPU.
- 8GB RAM.
- 40GB Hard Drive.
- VMWare 5.5U2 1 CPU License or Hyper-V License.
- Access to Customer-Provided Internet.

The customer-provided virtual machine will allow CloudConnect to be installed to enable CommandCentral cloud applications to connect to on-premises applications, like CAD/RMS systems.

RE: Door replacement

Proposed:

Remove existing door and frame. Replace with a 16-gauge galvanized metal frame and a 16-gauge Galvanized door with insulated polystyrene core. Door to have new aluminum threshold, weatherstripping, and new door closer. Hardware to be satin chrome. Lockset is a grade 1, electrified mortise type powered by card reader.

I have attached a door submittal with all the specifications circled in red. As it is now the door spec. is for regular doorknob, but we can get it with a lever style if that is what you want. (4/11/22 if the project goes forward, I will submit a new door submittal)

Included in price:

1. New door and frame and associated hardware in submittal and installation.
2. Addressing area above existing frame. We may be able to fill in with block or make a new filler panel.
3. Painting of new frame and door.
4. Electrical for the door latch.

Total cost- \$10,454.00

NOTE: The new lock cylinder will not be compatible with the old key.

Thank you,

Joe Johnson
